| AM 12: HOUR | :34 MINUTES | YEAR 2016 | MONTH 01 | DATE 01 |

| Fahrenheit | Celsius | Snooze Duration |
|---|---|

| TEMP °F | TEMP °C | SNOOZE 10 |

## Nap Feature

Sometimes, we just want a quick nap without having to set a new alarm.  Set the nap duration one time, then, a simple press of the **NAP** button starts the nap countdown.

### Set Nap Duration:
1. Hold the **NAP** button for 3 seconds. **NAP** and the duration will show (default is 10 minutes).
2. Use the **+/-** buttons to select a nap duration (up to 120 minutes).
3. Press the **NAP** button to confirm and start nap count down to zero.
4. Press the **SNOOZE/LIGHT** button at any time to exit settings.

### Ready for a Nap?
Press the **NAP** button once, and the clock will wake you at the preselected time.

Nap Duration

Nap Countdown Complete

- Press the **NAP** button once to start the countdown.
- **NAP** and the time will show in minutes and seconds.
- Minutes and seconds will countdown.
- When the alarm sounds **NAP** and **00m 00** will flash. The alarm will sound for two minutes and then stop if no buttons are pressed.
- Press any button except **SNOOZE/LIGHT**, at any time to exit nap settings.

## Backlight (HI-LOW-OFF)

- When operating with the power cable, the backlight is adjustable: HI-LOW-OFF.
- Press and release the **SNOOZE/LIGHT** button to adjust backlight.
- When operating on batteries only, the backlight will come on briefly when the **SNOOZE/LIGHT** button is pressed.

# USB Charge Ports

**USB Output:** Up to 3 Amps total if both ports are used
• Charge devices that self-regulate.
• Do not charge multiple devices from the same USB port.
• Must operate clock with power cable to charge other devices.
• Plug your device into one of the USB ports on the front of the clock.
• The clock will show HELLO for 3 seconds.
• The lightning bolt will flash while charging.
• When battery is full and minimal power is drawn,
  a solid battery icon is displayed.
• When no device is connected, no battery will show.

Full          Charging

Charging      Not Connected
**IMPORTANT:**
• When two devices are plugged into the clock (USB1 and USB2)
  charging port at the same time, and the total current output is
  3A for both ports combined.
• If only one device is plugged into the clock (USB1 or USB2)
  charging port, the maximum current output can reach 2.4A.

# Time Alarm

# FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

This device must not be co-located or operating in conjunction with any other antenna or transmitter.
**Operation is subject to the following two conditions:**
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

**Caution!**
The manufacturer is not responsible for any radio or TV interference caused by unauthorized changes or modifications to this equipment. Such changes or modifications could void the user authority to operate the equipment.
