

10" Atomic Wall Clock

Model: 404-1225
DC: 113016

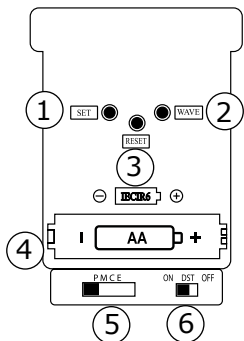

For information about WWVB, atomic time signal visit:
<http://bit.ly/AtomicTime>

Power up

- ① On the back of the clock, select Time Zone and Daylight Saving Time (DST) ON or OFF.
- ② Insert 1 AA battery into the movement.
- ③ For best reception, place clock on a wall that faces Ft. Collins, Colorado.
- ④ During the night, your clock will set itself.

IMPORTANT:

- Hands will move to 12:00 and search for the atomic time signal.
- If no time signal is received, after 8-10 minutes, the clock will start running from 12:00.
- Clock will search for the atomic time signal again after midnight, when signal is strongest.
- Allow up to 5 nights for the clock to receive the atomic time signal.
- On the following page are instructions to manually set your clock.

- ① SET
- ② WAVE (Atomic search)
- ③ RESET
- ④ Battery
- ⑤ Time Zone Selector
- ⑥ DST Selector

Set the clock manually

- ① Hold **SET** for 3 seconds
- ② Press and Hold **SET** to move hands quickly.
- ③ Press and release **SET** to move hands forward step by step.
- ④ Once received, the atomic time signal will override manual settings.

Reset

Press the **RESET** button on the movement one time to restore the clock to default settings.

Specifications

Batteries: 1 AA (IEC LR6) required in movement
(Alkaline recommended)
