Get Started

**Step 1:** Insert 2 fresh AAA, LR3 1.5 volt batteries into the TX45UTH-IT sensor according to the polarity.

**Step 2:** Insert 2 fresh AAA, LR3 1.5 volt Alkaline batteries into the forecast station according to the polarity markings.

**Step 3:** After 5 minutes place sensor outside in a shaded location.

**Restart:** If the outdoor temperature shows dashes, remove batteries from the forecast station & outdoor
sensor. Press any button on the forecast station 20 times. After 15 minutes, return to Step 1.

Set 12/24 Hour, Temperature Units, Time

1. Hold the SET button to enter time set mode.
2. Press the + button to adjust values.
3. Press the SET button to confirm adjustments and move to next item.

Settings order:
1. 12/24 Hour Format
2. Hour
3. Minutes
4. Year
5. Month
6. Date
7. °F /°C

Press SET to exit, or wait 30 seconds without pressing buttons to return to the normal time display.

View/Reset MIN/MAX Readings

1. Press the MIN/MAX button repeatedly to view:
   - Indoor minimum temperature
   - Indoor maximum temperature
   - Outdoor minimum temperature
   - Outdoor maximum temperature
2. Hold the MIN/MAX button for 3 seconds to reset all MIN/MAX temperatures.

Outdoor Temperature Reception Icon

- The outdoor temperature reception icon will flash every second when searching for the sensor.
- Once connected, reception icon will be solid.
**Low Battery Icon**

- When displayed by the outdoor temperature, replace batteries in the outdoor sensor.
- When displayed by the time, replace batteries in the forecast station.

**Moon Phase**

The moon icon of the weather station will also display all 8 moon phases throughout the year according to the set calendar. A bar segment above the moon phase will indicate current moon phase.

![](moon-phases.png)

**Forecast Icons**

The forecast station uses changing atmospheric pressure to predict weather conditions for the next 12-hours with 70-75% accuracy.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device must not be co-located or operating in conjunction with any other antenna or transmitter.

Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

Caution!
The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.
